

# PARASORB RESODONT<sup>®</sup> Flex

NEW

## Product features:

- Resorbable in 3 - 4 months
- High tear strength
- Biocompatible
- Easy adaptation to the defect
- Does not stick to instruments

NEW

# PARASORB RESODONT® Flex

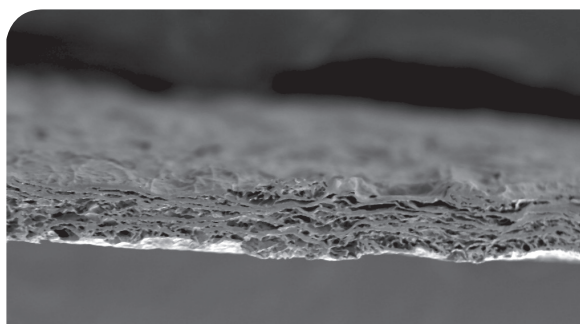

PARASORB RESODONT® Flex is a very tear-resistant, yet flexible, resorbable barrier membrane of porcine collagen origin. Its excellent handling property makes it easy to adapt to the bony defect. PARASORB RESODONT® Flex does not stick to surgical instruments.

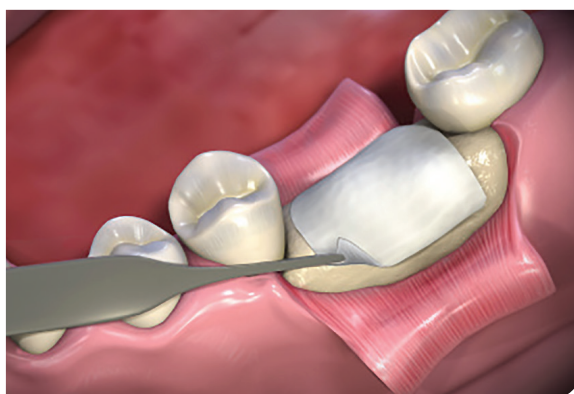

**It is suitable for oral surgical procedures for guided bone and tissue regeneration.**

### Field of applications:

- Augmentation around dental implants
- Alveolar Ridge Augmentation
- Cover for intra-bony defects and root resection
- Periodontal Regeneration
